SIRCHIE® has set the standard for high-quality fingerprint recording products for more than 50 years. Fingerprinting is an important process and a primary method for identifying individuals. With the proper fingerprint records, positive identification may be achieved.

It is important that quality materials be used during the fingerprint taking process in order to obtain the most reliable results.

SIRCHIE offers three methods of fingerprint taking. Each method utilizes one of the following elements: (1) an ink slab and roller, (2) PrintMatic™ Roller, (3) PrintMatic™ Impeccable Ceramic and Flawless Pads, Porelon® Pads

SIRCHIE offers these products as well as a full line of equipment and supplies to complement each fingerprint taking method including:

• Fingerprint Inks
• Ink Cleaning Supplies
• Postmortem Fingerprinting Equipment
• Fingerprint Record Cards
• Educational Tools

Phone: (800) 356-7311 • (919) 554-2244  Fax: (800) 899-8181 • (919) 554-2266
Quality materials must be used during the fingerprint taking process in order to obtain desirable results!

**METHOD ADVANTAGES:**

1. The **Ink Pad Method** is an easy to use, high quality alternative to either ink rolling method. The Ink Pad Method combines the ridge detail of the slabs methods with convenient, fast, no mess fingerprint taking. SIRCHIE offers three types of ink pads:
   - **PRINTMATIC™ Ceramic Pads**—high quality ceramic with capillary action ensures the proper amount of ink is applied to each finger.
   - **PRINTMATIC™ Flawless Pads**—similar to ceramic, the high quality thermoplastic pad offers the same inking control as ceramic at a lower cost.
   - **Porelon® Pads**—an industry standard introduced by SIRCHIE over 30 years ago, these pads provide high quality impressions.

2. The **pre-inked PRINTMATIC™ Roller** Method requires no advance inking preparation because it contains a built-in ink supply. The main advantage of this method is that it requires less skill to roll out a uniform coating of ink to obtain satisfactory prints.

3. The **Ink Slab and Roller** Method requires more skill than the pre-inked roller and pad method, but the prints obtained tend to be cleaner and of sharper contrast. That makes them ideally suited for computer enhancement and database storage.

**WORK TABLE HEIGHT:**

For best results, the inking area and cardholder should be approximately 39” (99cm) from the floor. This height allows the forearm of a subject of average height to be approximately parallel to the floor, at which position it is best to roll and record fingerprints. SIRCHIE offers several fingerprint taking stations that are either pedestal-mounted at the required height or desktop design that, when placed on the average table top, will achieve the height required.

**PREPARING THE INK SLAB**

**Slab and Roller Method:**

**STEP 1**—Apply a small amount (about a 1/4” stream) of fingerprint ink on the right side of the slab, toward the back. Roll a two- to three-inch-wide layer of ink on the back portion of the slab—lifting the roller off the slab after each stroke and returning to the starting point (do not use a back-and-forth motion with the roller). Repeat several times until a thin film of ink forms on the roller.

**STEP 2**—Next, using the same roller motion (without rolling back and forth), spread the layer toward the front edge of the slab, until a smooth, uniform coating of ink forms. The front edge is where the fingerprints are rolled. When the ink on the front edge becomes too thin, replenish the ink roller on the back edge of the slab and repeat **STEP 2**.

**PRINTMATIC™ Roller Method:**

Like the Slab and Roller method, the PRINTMATIC™ method requires that the operator roll ink onto an inking slab. The difference is that with the PRINTMATIC™ pre-inked roller, coating the slab requires only a few passes of the roller in the same direction to apply a thin, even layer of ink (Fig. 1).
**Ink Pad Method:**
No advance preparation is needed to use pre-inked pads. However, the pad surface should be cleaned occasionally to remove oil and dirt deposits by wiping the surface lightly with a soft, dry, lint-free cloth.

**INKING AND ROLLING THE FINGERS:**
The following recommended procedure is practiced by the FBI.

To avoid possible smearing, always begin the fingerprint taking procedure by inking and rolling the fingers on the right hand.

It is recommended that each finger be inked and rolled individually (i.e., ink the thumb, then roll it immediately, ink the forefinger, then immediately roll it, etc.). If all the fingers are first inked and then rolled, there is a chance some ink may be transferred from a finger as it is curled out of the way prior to rolling, thus causing that finger to print lightly when rolled.

After the fingerprints on the right hand are recorded, ink and roll the fingers on the left hand. When that is accomplished, record the plain impressions of both hands. An examination of the fingerprint record card reveals that these steps follow the order of the space allotted for each set of impressions.

1. The subject stands to the right and rear of the operator (Fig. 2). The operator grasps the subject’s right hand with his right hand, cupping his fingers over the subject’s fingers and tucking under those fingers not being inked. He uses his left hand to guide the finger being inked. The right thumb is inked and rolled first. The thumb is inked by rolling it from right to left, toward the subject’s body. The thumb is inked from nail to nail to a point just below the first joint. Apply ink one time only.

2. Once the thumb is inked, immediately transfer the ink to the record card in the space numbered 1 (Right Thumb). Roll the thumb from the right side to the left side (toward the subject’s body).

3. Next, ink the right forefinger by rolling the finger from left to right (away from the subject’s body) (Fig. 3). Ink from nail to nail and just below the first joint. Transfer the ink to the record card by rolling from left to right in space No. 2 (Forefinger). Repeat this process for the remaining fingers by inking and rolling each finger individually (Fig. 4).

4. Reposition the record card to permit adding impressions from the left hand. Ink the left thumb by rolling it from left to right (toward the subject’s body), and then transferring the ink to the record card, Finger No. 6 space, by rolling from left to right.

5. Ink the left forefinger by rolling it from right to left (away from the subject’s body). Transfer the ink to the record card by rolling it from right to left. Ink and roll the remaining fingers individually.

6. Plain (Slap) impressions are taken last. (Fig. 5) Reposition the record card to permit entry to the bottom area of the record card. Ink the left thumb by pressing it straight down onto the ink. Transfer the ink to the Left Thumb box in the plain impression area.

7. Ink the remaining four fingers of the left hand simultaneously by pressing them straight down onto the ink. Press all four fingers onto the plain impression area for the left hand of the record. Position the fingers at a slight angle to permit all four finger impressions to be recorded (Fig. 6).

8. Repeat this procedure for the thumb and remaining fingers of the right hand.
Obtaining useable recorded fingerprints is often a challenge, but by following a few basic steps prior to and during the taking procedure, a good set of fingerprints will be the rule—rather than the exception.

PRE-RECORDING

- The fingers to be recorded must be absolutely clean and dry. Sirchie offers a wide selection of hand cleaning materials—from our disposable towelettes (FPT256) to Waterless Hand Cleaners such as the FPT248-series. Once the hands, and especially the fingertips are clean, have the subject dry them with a paper towel. The fingertips must be completely dry.

- Caution the subject not to attempt to assist the inking and rolling procedure by twisting the fingers or by applying downward pressure. The person recording the prints must remain in complete control.

- Too much ink is just as destructive as too little. Regardless of whether you are using one of Sirchie’s variety of fingerprint ink pads, the ink, slab and roller method or any of our “Printmatic Ink” options, make a test print on a sheet of paper to determine if enough ink is available. See Example of “good-quality prints” to the right.

- Apply steady, even downward pressure when inking and rolling.

- Do not ink all fingers prior to rolling—ink a finger and then roll it. Pre-inking may result in the subject touching and transferring ink to his palm.
PrintMatic™ IMPECCABLE CERAMIC FINGERPRINT PADS

It one of the leading causes of poor impressions is over-inking of the fingers. The PrintMatic™ Impeccable Ceramic Fingerprint Pad is an ink pad system which is able to compensate for poor technique and uncooperative subjects by not only controlling the amount of ink on the pad surface, but by eliminating the effects of overpressure.

Through the use of a micro-pore ceramic, PrintMatic™ Impeccable Ceramic Fingerprint Pads draw ink to the surface by capillary action. EZID ink is a stainfree, high-contrast, instant-drying, permanent ink.

PrintMatic™ IMPECCABLE CERAMIC POCKET FINGERPRINT PADS

The EZID100 and EZID200 have the same quality features as the full-sized ceramic pad, but are pocket-sized for maximum portability and convenience. Perfect for use in the field or office.

Pocket Ceramic Fingerprint Pad

The No. EZID701 has the same quality features as the full-sized ceramic pad, but is pocket-sized for portability and convenience. Measuring just 4.5 cm x 5.5 cm, the No. EZID701 can be carried anywhere, but unlike other pocket-sized pads, it’s large enough and uniquely-shaped to allow the taking of rolled as well as plain impressions. Perfect for use in the field or office.

Catalog No. Description Price
---
EZID100 Micro PrintMatic™ Ceramic Fingerprint Pad, 1 5/8” (4.1cm) dia. $8.95
EZID100 Volume pricing when ordering 6 pads or more $7.50
EZID200 Mini PrintMatic™ Ceramic Fingerprint Pad, 2” (5.1cm) dia. $14.95

PrintMatic™ Pocket Ceramic Fingerprint Pad, 1.77” x 2.16” (4.5cm x 5.5cm) $8.95

**PrintMatic™ FLAWLESS INK PAD**

This revolutionary concept for recording fingerprints features a specially designed microporous membrane that employs a pore size of 7 to 10 microns, affording a higher degree of detail in the fingerprint impression. It produces thousands of rolled and plain impressions.

The benefits to the fingerprint technician become obvious when using the Flawless system. The ink pad provides, through capillary action, just the right amount of ink on its surface—not too much and not too little. Less pressure is needed when fingers are rolled across the pad’s surface so less distortion is transmitted to the resulting impressions.

PrintMatic™ Flawless ink pads are supplied in our unique multi-mount, injection molded, copolymer polypropylene case. These cases are equipped with a positive, snap-lock lid to protect the ink surface from airborne contaminants.

**HIGH-QUALITY PRINTS**

The Flawless Pad features our latest stainless PrintMatic™ ink formula, which means simpler cleanup after prints are taken. You’ll find the prints you get to be sharp, well defined and crisp with exceptionally high contrast.

---

**FEATURES:**
- Multi-Mount Injection Molded Co-polymer Polypropylene Case, black textured finish
- Stainless ink formula facilitates cleanup
- Sharp, crisp, high-contrast impressions
- Quick, easy cleanup
- Over 10,000 single impressions

**SPECIFICATIONS:**
- Weight: 3 oz., 85g
- Dimensions: 6 1/4"W x 3"D x 1/2"H (15.9cm x 7.6cm x 1.3cm)

PORELON® FINGERPRINT PAD
This pocket-sized pad, introduced by SIRCHIE® more than 20 years ago, is the accepted STANDARD by law enforcement worldwide. Each pad may be used to record thousands of fingerprints. A two-year supply of ink is impregnated in each pad (based on 75°F with lid closed after use), and is excellent for use in the field or office.

The thermal-impregnated fingerprint ink is non-fading and dries on-contact. Ink rises to the surface as required through capillary action of the micro-reticulated thermoplastic resin. Recorded fingerprints from this pad are accepted by state and federal agencies. The Porelon® pad utilizes the multi-mount injection molded case for versatility in mounting options.

To remove ink residue, see SIRCHIE’s ink removal products.

PORELON® PALM PRINT PAD
Featuring a 5” x 6 1/8” Porelon® ink pad in a hard plastic case, this unit is designed especially for taking palm prints. The thermal-impregnated fingerprint ink is non-fading and dries on-contact. Ink rises to the surface as required through capillary action of the micro-reticulated thermoplastic resin. Use this pad with our AP110 or AP112 Palm Print Record Cards.

Use our pocket-sized fingerprint pads for:
- Elimination fingerprints at the crime scene
- Driver’s licenses
- Identification badges
- Children’s records
- Traveler’s checks
- Evidence marking
- Stocks, bonds and other documents
- Many, many more uses

FEATURES:
- Permanent, non-fading ink
- Instant drying
- Just touch the pad and record the print on any porous surface
- Thousands of prints—no re-inking

SPECIFICATIONS:

PMP100 Micro Porelon®
- Net Weight: 0.5 oz. (15g)
- Dimensions: 5/8” x 1 5/8” dia. (1.6cm x 4cm dia.)
- Case: Polypropylene w/live hinge

PMP1002 Mini Porelon®
- Net Weight: 0.9 oz. (26g)
- Dimensions: 5/8” x 2” dia. (1.6cm x 5.1cm dia.)
- Case: Polypropylene w/live hinge

PMP200 CITAKE™ PORETOLN® Pocket Kit w/ PMP100 Micro Pad $14.25
PMP200T CITAKE™ Flawless™ Pocket Kit w/ PFP601 Mini Pad $13.00

MICRO AND MINI PORELON® FINGERPRINT PADS
These pocket-sized pads give you the same reliable, detailed prints as our full size pads. Primarily for single fingerprint recording on checks, documents, traffic summons, etc.

CATALOG NO. DESCRIPTION PRICE
PMP100 Micro PORELON® Fingerpad, 1 5/8” dia. $10.95
PMP1002 Mini PORELON® Fingerpad, 2” dia. $11.50

PRINTMATIC™ FLAWLESS™ POCKET FINGERPRINT PADS
Pocket pads provide Flawless™ ink for thousands of single impressions. To remove ink, rub fingers together or use a dry paper towel.

CATALOG NO. DESCRIPTION PRICE
PFP601 Micro PrintMatic™ Flawless™ Ink Pad, 1 5/8” dia. $7.25
PFP602 Mini PrintMatic™ Flawless™ Ink Pad, 2” dia. $9.95
**Convenience of a pad, but the performance of a slab!**

SIRCHIE®’s PRINTMATIC™ Pre-Inked Roller successfully combines the advantages of the Porelon® pad and the ink slab and roller methods of fingerprint taking. The advantages include the excellent clarity obtainable with a properly executed slab and roller print and the ease and speed associated with the Porelon® pad method.

The slab and roller method has endured over the years primarily for two reasons:

1. The quality of the inked area on the slab can be seen and judged prior to inking and rolling the fingers.
2. When a proper layer of ink is applied, the rigid, nonporous slab surface and the thin layer of ink prevent over-inking of fingers.
3. Prints obtained from the Slab and Roller Method are clean and sharp and are ideally suited for comparison viewing and computer scanning.

Although possessing advantages, using the Slab and Roller Method has drawbacks as well. The Slab and Roller Method normally requires a relatively skilled technician to roll a thin and even layer of ink necessary to obtain exceptional fingerprint impressions. If the ink layer is too thick, spotty, or uneven, it is likely the technician will record poor prints. This method can also be quite messy with ink splattering on the slab or surrounding items requiring extensive cleanup.

To address these considerations, SIRCHIE PRINTMATIC™ Pre-Inked Porelon® Roller successfully eliminates the disadvantages of the ink slab and roller method while retaining the advantages. The PRINTMATIC™ automatically applies a thin and even layer of ink onto an ink slab, regardless of the operator’s skill in rolling out ink, because the PRINTMATIC™’s ink reservoir is in the roller! In addition, cleanup is much easier because there is not much ink left on the slab after fingerprints are rolled.

**PIP100 CONTENTS:**
- 1 Pre-Inked Porelon® Roller
- 1 Protective Metal Case
- 1 SF0077 Latex Gloves, 1 pair
- 2 FPT1 Super Cleaner Towelettes

**SPECIFICATIONS:**
- Net Wt.: 1 lb. (0.45kg)
- Ink Roller Width: 3” (7.6cm)
- Overall Dimensions: 6” x 4 5/8” x 1 3/4” (15.2cm x 11.7cm x 4.5cm)
Step 1. The operator inks subject’s palm with the No. PIP100H Roller.

Step 2: The operator rolls the palm onto card using the No. AP300PIP.

Step 3: The resultant palm print displays clear ridge detail.

**PRINTMATIC™ HORIZONTAL ROLLER**

The PRINTMATIC™ Horizontal Roller is a handy, versatile version of our superb PRINTMATIC™ pre-inked Porelon® fingerprint roller. The PIP100H is designed for horizontal (parallel) ink-rolling of the slab or directly on the hand. The unit’s high-impact, ABS-plastic tubular housing prevents environmental contamination when the roller is not in use. The PIP100H features a comfortable, easy-grip, plastic handle. The PRINTMATIC™ Horizontal Roller is an excellent choice for replacement of ink and roller assemblies used in field fingerprint taking kits.

**SPECIFICATIONS:**

- Net Wt.: 6.6 oz (188g)
- Ink Roller Width: 3” (7.6cm)
- Dimensions: 8 1/2” x 1 3/4” dia. (21.6cm x 4.5cm dia.)

Fingerprint Slab Ink

**The World’s Best Fingerprint Slab Ink**

**SEARCH FINGERPRINT INK**

Specially formulated exclusively for fingerprint work, this densely-black ink is free-flowing, easily rolled, and dries quickly on paper, but will remain soft and usable on a slab for days. This ink is not adversely affected by extreme temperature changes. It is used by large and small identification departments throughout the world.

**SupremInk™ FINGERPRINT INK**

**SIRCHIE**’s SupremInk™ is easy to dispense, roll out, and clean up. Only a few drops of SupremInk™ are needed to roll a thin, even layer of ink — perfect for producing fingerprints with superb ridge detail. SupremInk™ won’t dry out on the ink slab surface, but dries almost immediately on contact with the fingerprint card.

- Low Viscosity Ink — makes for easier dispensing, rolling, and cleanup.
- Quick Drying — ready before the next fingerprint is taken.
- Consistent Formulation — the first drop is as good as the last.
- Fast Cleanup — easily removed from fingers and glass slabs by rinsing with water and wiping with a light towel on steel slabs.
- Metered Dispensing — 1 drop = 3.5ml (0.19 fl. oz.)

Disposable Ink Strips and Inking Slabs

**DISPOSABLE INK STRIPS**
Disposable Ink Strips feature a thin layer of Sirchie®'s famous fingerprint ink sandwiched between two thin sheets of plastic. The ink strips produce excellent fingerprint images. *For commercial and public use. Not recommended for criminal fingerprinting.*

Separating the two layers exposes the ink strip surface.

LANSBERRY’S RIDGE BUILDER
Lansberry’s Ridge Builder is a unique solution that will bring excellent definition and clarity to fingerprint ridge structures. Lansberry’s Ridge Builder is applied to the finger bulbs before fingerprinting—making it possible to obtain legible fingerprints from brick masons, agricultural workers, the elderly, or anyone else who has poor fingerprint ridge structure. This product will help increase the number of successful print recordings and subsequent comparisons by ensuring better fingerprint detail. Available in two forms: liquid and disposable pads. Apply liquid with a cotton swab or wipe disposable pad on fingers before fingerprinting.

EZ SCAN RIDGE ENHANCER
Due to the activities, vocation or age of some people, their damaged and worn fingerprint ridges or lack of hydration of the skin can make it difficult to obtain legible fingerprints. EZ Scan Ridge Enhancer was developed to enhance ridge detail in these instances using a new proprietary rehydration formula. Once applied to the fingers with the built-in foam applicator pad, EZ Scan Ridge Enhancer rehydrates the skin and expands the friction ridges—producing improved detail in subsequently recorded fingerprints. EZ Scan Ridge Enhancer works equally well with traditional fingerprint inking methods and live scan apparatus and won’t leave any residue on ink surfaces or a live scan platen glass.

EZ Scan may also be used to restore desiccated, mummified fingers on cadavers. In cases where finger tips are dehydrated, one or two applications of EZ Scan will restore the ridges enough to permit gaining legible prints. Mummified fingers can be soaked in EZ Scan solution to restore ridge detail. Once complete, fingers can be processed through casting or conventional cadaver fingerprint taking methods.

*EZ Scan Ridge Enhancer is non-toxic and non-flammable.*

SEARCH SUPER FINGERPRINT INK ROLLER

The SEARCH Super Fingerprint Ink Roller is one of the finest ink rollers made. The roller assembly is designed to ensure operator comfort for effective ink spreading. The roller’s black-wrinkle-finished steel frame provides the proper weight and balance for optimum control. The roller features a high-density, medium-soft composition rubber that will withstand repeated cleaning with harsh solvents. The roller bracket is designed to prevent the roller from touching the inking table when not in use.

SEARCH EASY-GRIP FINGERPRINT INK ROLLERS

This line of quality ink rollers features an unbreakable, custom-designed thermoplastic handle for maximum operator comfort and control. The frame design prevents the roller from touching the inking table when not in use. A high-density, medium-soft rubber roller element withstands repeated cleaning with harsh solvents. The roller is easy to disassemble when replacement parts are required.

MULTI-MOUNT INJECTION MOLDED CARDHOLDER
(PATENT PENDING)

The FPT263 features solid injection molded materials designed for long life, easy use, and exceptional service.

This cardholder features multi-mounting capabilities: fasten it to a wood or metal surface using screws, or use the magnetic strips for mounting to a steel cabinet. For portable, desktop use, non-slip rubber feet are supplied. The moveable card retainer secures it in place with a positive, snap-lock feature and it has an integral hinge assembly for a lifetime of usage.

FEATURES:
• Multi-mount options with screws, rubber feet or magnetic feet
• Positive-Snap Lock secures record card

SPECIFICATIONS:
• Injection molded components
• Black textured finish
• Dimensions: 9 9/16”W x 3 7/8”D x 1”H (24.3cm x 9.8cm x 2.5cm)
• Weight: 3/4 lb., 340gm

FEATURES (FPT264, FPT264A):
• Cardholder Base: Nickel plating and vinyl-clad, platinum (gray)
• Cardholder Materials: Vinyl-clad aluminum, platinum (gray)

SEARCH REGULAR & DUPLEX FINGERPRINT CARDHOLDERS

The Regular cardholder holds standard 8” x 8” fingerprint record cards firmly in place—preventing slippage or smudging. The FPT264 features a rugged, brushed-nickel-finished steel base and a vinyl-covered aluminum frame. Each unit is designed with integral mounting brackets for easy desk or tabletop mounting. The Duplex Cardholder is an ideal choice when multiple fingerprint records are required. Cardholders are permanently mounted on a platinum, vinyl-clad aluminum base. Each base features pre-drilled integral mounting brackets. Unit now available for use with A4 sized cards!

SEARCH Clamp-On Fingerprint Cardholder

This fingerprint cardholder is excellent for use at various locations because it can be mounted on almost any flat surface. The cardholder features an integral threaded clamping screw that provides a stable and slip-free mount. An overlapping lip allows for instant positioning. Unit holds all standard 8” x 8” record cards.

Our white 110 lb. card stock provides a high-contrast background for black fingerprint ink.
CHILD FINGERPRINT CARDS

SIRCHIE®’s Child Fingerprint Cards are printed on standard format 8” x 8” fingerprint record cards and they’re designed specifically for fingerprinting children. Space is provided on the card for recording pertinent information about both the child and parents. The cards are printed on 110-lb. index card stock. They will not wrinkle or crease when placed in a printer. An excellent choice for child identification programs.

MAJOR CASE AND TIP PRINT CARDS
Major case cards should be utilized on robbery suspects, as well as sexual assault, homicide and burglary suspects because latent prints recovered from crime scenes may include palms, finger tips and finger joints. The FC332 is a two-card system that allows for easy storage in a conventional 8" x 8" record card file. The 8" x 16" forms are printed on high quality 110-lb. index card stock with a fold line in the middle. There is a form on the front of each card for recording the inked impressions. Detailed instructions on the back of each card describe how to record the impressions and there is an area to record the suspect’s personal information. The FC332 consists of 50 sets of palm print cards and tip print cards. These cards supplement standard 8” x 8” record cards.

POSTMORTEM RECORD STRIPS
These unique record strips are designed specifically for use with the SIRCHIE® PMNS60 Postmortem Record Strip Holder or PMNS60B Folding Postmortem Strip Holder. They are offered in two forms—standard and adhesive-backed. The standard record strips feature a white finish and absorb ink rapidly. Made from 110-lb. index card stock, they are an exact match to standard 8” x 8” fingerprint record cards. The adhesive-backed record strips also feature a white finish and absorb ink rapidly. Their crack-and-peel adhesive backing adheres easily to standard 8” x 8” fingerprint record cards. Dimensions (all strips): 8” x 1 1/2” (20.3 cm x 3.8 cm).

Fingerprint Card File Cabinet, Wall Charts & Video

BUREAU FINGERPRINT AND PALM PRINT RECORD CARD FILE CABINET FOR STANDARD 8” x 8” CARDS

Designed to make the filing of your 8” x 8” fingerprint record cards quick, easy, and organized, each drawer of the cabinet features a double compartment to accommodate two rows of 8” x 8” cards. Each row will accommodate 2,000 cards; each drawer will accommodate 4,000 cards. The cabinet has five (5) drawers—offering a capacity of 20,000-8” x 8” fingerprint record cards. Each cabinet is precision-built and made of heavy-gauge, cold-rolled steel. Every drawer moves effortlessly on thick, ribbed-steel guides and 10 roller bearings. Cabinets are available with or without a lock.

Systematic spot-welding throughout assures structural integrity. This is a filing cabinet designed to endure years of continual service.

Available in three colors:

- Black
- Tan
- Gray

FEATURES:
- Five Drawer
- Double Compartment Drawers
- Heavy-Gauge, Steel Fabrication
- Rib and Roller Bearing Drawers
- Accommodate 20,000 Cards
- Dimensions: 51-5/8”H x 21-1/4"W x 28-5/8”D (1.3m x 54cm x 72.7cm)

CRIME SCENE FINGERPRINT ELIMINATION KIT
This kit is designed for differentiating between the latent prints of those who have regular access to a crime scene and unknown latent prints. This eliminates unnecessary comparison of known latent prints with those on file. Each kit includes a fingerprint ink pad, elimination fingerprint forms and super cleaner towelettes in a compact, molded plastic case. Kits are available with a regular Porelon® pad or our PrintMatic™ Flawless fingerprint pad.

ELIMINATION FINGERPRINT OUTFIT
This convenient pocket-sized kit is designed for differentiating between latent prints of those who have regular access to a crime scene and unknown latent prints. Each outfit comes with a replaceable notebook that contains 50 printed fingerprint forms. Record the subject’s fingerprints on the front of the form and the date and other information on the back. Kits are available with a regular Porelon® pad or our PrintMatic™ Flawless fingerprint pad.

CRIME SCENE FINGERPRINT ELIMINATION KIT WITH PrintMatic™ IMPECCABLE CERAMIC POCKET PAD
This kit is designed to aid in eliminating latent prints found at the crime scene of those who have legitimate access. The recorded fingerprints are then submitted along with the lifted latent prints for examination and elimination by the technical staff before file or AFIS searching.

The kit is constructed of black vinyl-finished aluminum in a two-piece configuration with magnetic catches for easy removal and recovery.

PrintMatic™ Roller Method
Fingerprint Taking Outfits

SIRCHIE®’s PrintMatic™ Fingerprint Taking Outfits feature the revolutionary PrintMatic™ pre-inked Porelon® ink roller. Even a beginner may obtain fingerprints of exceptional quality using one of these outfits. That’s because it is possible to roll a thin and very even ink layer with the PrintMatic™. In fact, it is almost impossible to over-ink a subject’s fingers or palms. The outfits are available with one or two cardholder(s) and feature a storage compartment for supplies. Place either outfit on a desk or table to achieve regulation height for rolling and recording prints, or use the brackets included with each to mount to the wall. A rugged, hinged storage container protects the PrintMatic™ roller when it is not in use.

ABOUT SUPPLEMENTAL FINGERPRINTS
Supplemental fingerprints are commonly referred to as palm prints. Like fingerprints, palm prints can provide the investigator with a means of positive identification. Palm prints are sometimes the only form of latent print evidence found at a crime scene. They’re particularly common in burglary cases, because the perpetrator often places his palms on window sills, casements or on the top of furniture while forcing entry as well as during the crime.

Use of Palm Prints
Often, the investigator must rely on palm prints—full or partial—for positive identification due to insufficient latent fingerprint evidence. Palm prints are developed, photographed and lifted in the same manner as fingerprints. Like fingerprints, identification of palm prints is based on comparison of friction ridges and flexure lines. The investigator compares the latent palm prints and the suspect’s in the same manner as fingerprints.

A latent palm print, whether full or partial, offers a great number of minutiae points with which the investigator may compare for positive identification.

PORTABLE AUTOPALM® PRINTER KIT
The AP200 Autopalm® Printer provides the necessary equipment to roll and record palm prints accurately and quickly. The AP200 utilizes a Porelon® roller that applies a thin, even layer of ink along the contour of the entire palm in one simple motion. A clear impression of the palm, from fingerprints to the wrist, is then recorded on a palm print record card by rolling both over the card roller. The AP200 also may be used for postmortem cases. The AP200 is lightweight and portable, making it ideal for field use. A sturdy, molded-plastic carrying case is provided with each unit.

AP200 CONTENTS:
1- AP2003 Porelon® Palm Roller
1- AP2004 Image Transfer Roller
1- AP200CH Palm Roller Recording Mount
1- AP200PH Palm Roller Inking Mount with Cover
8- SFL288 Rubber Feet, Adhesive Mount

AUTOPALM® PRINT OUTFIT

The AP100 Autopalm® Print Outfit features all the necessary tools for rolling and recording clear and readable palm prints. This unit is self-contained and designed for desktop use. No external ink supply is needed. The Autopalm®’s Porelon® ink roller is designed and precisely positioned to ink the entire palm with just the right amount of ink. The unit’s soft-foam roller provides the proper surface for recording the print on the palm print record card. The ink roller is impregnated with a two-year supply of ink and is protected by a steel cover when not in use.

Fingerprint-Autopalm® Pedestal Combinations

COMBINATION FINGERPRINT-AUTOPALM® PRINT STATIONS

SIRCHIE®'s Combination Fingerprint-Autopalm® Print Stations are just what the name implies—pedestal-mounted fingerprint and palm print stations. These sturdy, freestanding stations are built at regulation height for rolling and recording both fingerprints and palm prints. They feature a sliding top which may be locked into position for fingerprint recording and slid back for access to the palm printing supplies. The stations are available with a regular Porelon® pad, our series of PRINTMATIC™ fingerprint pads, an ink slab and roller, or a PRINTMATIC™ pre-inked Porelon® roller. Each is equipped with a Porelon® palm roller and palm card roller. A storage area is provided behind the palm card roller for keeping record cards as well as other supplies.

- Removes fingerprint ink and stains from fingers and hands

### SEARCH Super Cleaner Towelettes
The SEARCH Super Cleaner Towelettes are individual, disposable ink-cleaning towels. They're napkin-size, and saturated with ink solvent that is easy on skin and mildly fragrant. They will quickly remove fingerprint ink or grime from hands and are excellent for field kits or office use. These towelettes are not the same as those sold in retail stores which contain a mild detergent. The SEARCH Super Cleaner Towelettes feature SIRCHIE®'s special formulation. Plus, they're sanitary and available in hermetically-sealed packages.

### SEARCH Multi-Purpose Waterless Cleaner Towelettes
SEARCH Multi-Purpose Waterless Cleaner Towelettes are excellent for almost every job from loosening and dissolving fingerprint ink to cleaning latent print powder from most surfaces. These aggressive, citrus scented towels are industrial strength but also gentle—fortified with an emollient and natural oils so they won’t crack or dry hands.

They are the perfect product when you do not have access to soap and water and they do not leave an annoying residue.

**PrintMatic™ PORELON® POSTMORTEM INK ROLLER SYSTEM**
This version of our PrintMatic™ pre-inked roller is designed specifically for recording fingerprints of the deceased. Ink is rolled directly onto the finger bulbs, which are then immediately applied to a postmortem record card. The rolling action helps avoid ink smearing. A thermoset plastic handle ensures operator control. The Postmortem Ink Roller is supplied in a metal housing to protect the roller surface from dust and other environmental contaminants.

**PrintMatic™ PORELON® POSTMORTEM HORIZONTAL INK ROLLER SYSTEM**
The Postmortem Horizontal Ink Roller is intended primarily for recording fingerprints of the deceased, although it may be used for many other field fingerprinting situations. The rolling action minimizes potential ink smearing and over-inking of the finger. Ink is always ready. The PM283PIPH is supplied with a protective tubular housing to prevent environmental contamination.

REGULAR AND FOLDING POSTMORTEM RECORD STRIP HOLDERS
Our regular postmortem record strip holder (PMNS60) is designed to hold our postmortem card strips for successful fingerprinting of the deceased.

The revolutionary-design of our folding postmortem record strip holder allows for perfect impressions. The curvature of the PMNS60B allows for ease of operation and reduces the chance of smudges.

POSTMORTEM RECORD STRIPS
These unique record strips are designed specifically for use with the Sirchie® PMNS60 or PMNS60B Postmortem Record Strip Holders. They absorb ink rapidly and are offered in two formats — standard and adhesive-backed. Standard Record Strips are made from 110-lb. index card stock and feature a white finish. They are an exact match to standard 8” x 8” fingerprint record cards. The Adhesive-Backed Record Strips also feature a white finish and their crack-and-peel adhesive backing adheres easily to standard 8” x 8” fingerprint record cards. Dimensions—all strips: 8” x 1 1/2” (20.3cm x 3.8cm).
