NARCOTICS INVESTIGATION
NARK® Products, Evidence Packaging, Surveillance Vehicles & Equipment, and Training Inside

NEW SYNTHETICS REAGENTS & KITS NOW AVAILABLE

SIRCHIE® Products • Vehicles • Training
www.sirchie.com • 800.356.7311
At Sirchie, we have a long history of developing and delivering timely solutions to the challenges faced by patrol and narcotics investigation teams. Please read through this booklet to learn more about:

- New NARK® presumptive drug reagent kits for Mollies, Synthetic Cathinones (Bath Salts), Synthetic Cannabinoids (K2/Spice), and the full NARK® offerings

- Evidence packaging and handling solutions including new KAPAK® bags along with our recommended nitrile gloves and other tools to help you complete your narcotics investigation

- Surveillance vehicles and related equipment to help you execute covert surveillance operations safely and efficiently

WEBINARS
Sirchie is committed to providing you training and timely information to help you stay informed on the latest legislation and substances you may encounter in your communities. These efforts include online training opportunities in a live webinar format where the law enforcement community can learn about topics including Understanding Mollies, Synthetic Cathinones, and N-BOMes and Understanding Synthetic Cannabinoids, Suboxone®, and Krokodil. Recordings of these live events are now available by contacting Jack Thorndike, Sirchie’s NARK® Sales and Training Representative at jackthorndike@aol.com.

On April 16th, we will be presenting “Narcotics Investigation: Handling False Positives” Registration details are coming soon and we will be presenting Narcotics Investigation webinars along with other relevant topics for law enforcement on a monthly basis.

NARK NEWS
Sirchie publishes NARK News, an electronic newsletter for the narcotics investigator, available for electronic download as a resource for law enforcement and will host these resources in our blog on the new www.sirchie.com website. There are currently seven volumes of NARK News available for you to download, read, and share.

NARK TRAINING
Sirchie can provide certification or instructor training for your department in the use of our NARK presumptive drug field tests. For more information, please contact Jack Thorndike at jackthorndike@aol.com.

VEHICLES ON GSA SCHEDULE
Most Sirchie vehicles and related equipment are on GSA Schedule including upgrade packages for Surveillance Vehicles. We understand that surveillance vehicles are often low mileage, high usage and we can work with you to upgrade your existing vehicle with the latest technology delivered in a cost-effective package. We are ready to answer any questions you have and provide you the right information you need. Please contact our Vehicle Division at vehicles@sirchie.com or (800) 545 7375 to discuss your needs and we will develop a customized solution for you.

For more info contact our Vehicle Division at vehicles@sirchie.com or 800.545.7375
MOLLIES REAGENT
The Mollie's Reagent is a general screening presumptive field test designed to direct law enforcement in the right direction to specifically identify the makeup of these synthetic stimulants. Always use the Mollie’s Reagent in conjunction with a second confirming field test.

The perception by both users and law enforcement of “mollies” is that this substance is 100% pure MDMA (Ecstasy). However, the reality is that most “mollies” being seized around the country today consists of other specific synthetic stimulants or a combination of them. These stimulants could be any of the following or a combination thereof:

- Amphetamines/Methamphetamine
- MDMA (Ecstasy)
- Letter Drugs (MDMA analogs)
- 2C Substances (Phenethylamines)
- N-BOMe (2C/Phenethylamine analogs)

NARK200MLE CONTENTS:
- 2 - NARK20032 Mollies Reagent, 10 tests/box
- 1 - NARK20015 Methamphetamine/MDMA (Ecstasy) Reagent, 10 tests/box
- 1 - NARK20024 MDPV (Synthetic Cathinones) Reagent, 10 tests/box
- 1 - KCP1000 Plastic Copolymer Carrying Case
- 1 - Mollies Sequential Testing Chart

NARK2000SYN CONTENTS:
- 3 - NARK20023 Synthetic Cannabinoids Reagent, 5 tests/box
- 2 - NARK20032 Mollies Reagent, 10 tests/box
- 2 - NARK20015 Methamphetamine/MDMA (Ecstasy), 10 tests/box
- 1 - NARK20010 Special Opiates Reagent, 10 tests/box
- 1 - NARK20024 MDPV (Synthetic Cathinones) Reagent, 10 tests/box
- 1 - NARK20025 Mephedrone (Synthetic Cathinones) Reagent, 10 tests/box
- 1 - NARK20026 a-PVP (Synthetic Cathinones) Reagent, 10 tests/box
- 1 - NARK20029 2C Reagent, 10 tests/box
- 1 - NARK20030 Psilocybin/Psilocin Reagent, 10 tests/box
- 1 - NARK2006 Acid Neutralizer Liquid 1 oz. (30ml)
- 1 - KCP1002 Black Plastic Copolymer Carrying Case Dimensions: 8.5” x 5.5” x 1.875” (21.6cm x 14cm x 8.1cm) Weight 2 lbs (907g)
SYNTHETIC CANNABINOID REAGENT
Many hours have been put into developing a reliable, NIJ compliant presumptive field test for synthetic cannabinoids. This solution identifies only the “indole based formulations” of synthetic cannabinoids in a 2-step process. Fortunately indole formulas represent over 75% of the street substances and include: #JWH-018, JWH-073, JWH-200, AB-001, AM-2201, RCS-4, RCS-8, XLR-11 and UR-144. This test does not color react with non-indole formulations, such as HU-210, CP47,496, or the new substance AKB-48, but fortunately these are less common and most street substances include multiple synthetic cannabinoids.

MDPV REAGENT
MDPV is a synthetic stimulant recognized as a Schedule I substance. This specific field test will presumptively identify MDPV, Butylone, Ethylone, Methylone, Naphyrone and Pentylone. Commonly found as a white to tan powder, these substances are being sold as everyday products like bath salts, stain remover, plant food or glass cleaner. Of the “bath salt” products on the market, this is the most popular chemical configuration currently and all testing should start with this specific field test.

MEPHEDRONE REAGENT
Mephedrone is the 2nd “bath salt” configuration of this synthetic stimulant found on the street. Not as common as the MDPV, we recommend conducting this test only after you have conducted the MDPV Reagent and not received a positive. This presumptive field test will positively identify Mephedrone with an IMMEDIATE Purple color after breakage and agitation of the 3rd ampoule. This product will again be sold as standard household substances like bath salts, stain remover, plant food or glass cleaner.

a-PVP REAGENT
a-PVP is the 3rd “bath salt” configuration of a synthetic stimulant. This presumptive test is a three (3) step field test with each color reaction necessary for a positive reaction. Sold as household substances, packages containing a-PVP like other “bath salt” substances, will show the phrase “Not For Human Consumption” on the front of the package.

2C (N-BOMe’s) REAGENT
In Sirchie’s continued efforts to address the ever changing face of drugs in this country, we are pleased to offer the 2C Reagent, the latest in a new group of synthetics sweeping the country.

In July of 2012, the Synthetic Drug Abuse Prevention Act was passed which included the substances of #2C-E and #2C-I (smiles). All of these 2C products are psychedelics based on a combination of MDMA and LSD which leads to extremely intense and long lasting highs.

EDUCATION OPPORTUNITY!
We offer a 4-hour certification training course and a 6-hour instructor course in the utilization of our presumptive drug field tests. Both are available at your facility. For more information, please contact Jack Thorndike at jackthorndike@aol.com.

NARK® II PRESUMPTIVE DRUG TEST POUCHES

NARK® II drug identification pouches have the capability of presumptively identifying several families of substances suspected of being abused drugs. Designed to function as a transportable narcotics laboratory, NARK® II pouches are available for use wherever the need for their capability might arise. Each of the tests is comprised of one or more chemical reagents. When a predictable color or series of colors occur within a specific testing sequence, a positive identification may be presumed.

Presumptive identification is generally recognized within our legal system as a component of probable cause. There is no drug identification system presently in use which completely eliminates the occurrence of false positives and false negatives. A forensic laboratory is required to qualitatively and quantitatively identify an unknown substance.

THREE PROGRESSIVE STEPS:

1. After removing the clip, insert a small amount of suspected substance into the test pouch.
2. Break ampoules from left to right and agitate.
3. Analyze resulting colors.

NARK® II provides presumptive I.D. of the following drug groups:
- Cannabis sativa L.
- Depressants
- Hallucinogens
- Narcotics
- Stimulants
- Synthetics

NARK® II Progressive System of Drug Identification allows testing of the following substances:
- 2C (Synthetic Cathinones)
- a-PVP (Synthetic Cathinones)
- Amphetamines
- Barbiturates
- Benactyzine
- Cannabis (Marijuana)
- Cocaine
- Codeine
- DMT
- Ephedrine
- Fentanyl
- GHB
- Heroin
- Ketamine
- LSD
- MDA
- MDMA (Ecstasy)
- MDPV (Synthetic Cathinones)
- Mephedrone (Synthetic Cathinones)
- Mescaline
- Methadone
- Methamphetamine
- Methaqualone
- Methcathinone
- Methedrine
- MMDA
- Mollies
- Morphine
- Oxycodone
- PCP
- Psilocybin (Psychedelic Mushrooms)
- Rohypnol
- Talwin
- Valium

NARK® II PRESUMPTIVE DRUG TEST KITS
SIRCHIE® offers a variety of combination NARK®II field kits in rugged plastic cases containing from 16 to 130 individual tests. Each of our NARK® II kits come with a progressive color chart and complete instructions. Custom kits are also available—contact SIRCHIE NARK® sales at (800) 356-7311 for details and quotes.

NARK200MK CONTENTS:
10- NARK2001-1 Marquis Reagent (Opium Alkaloids)
10- NARK2004-1 Ehrlich's Reagent (LSD)
10- NARK2007-1 Scott Reagent Modified (Cocaine HCl, Crack)
10- NARK20010-1 Special Opiates Reagent (Fentanyl, Heroin, Oxycodone)
10- NARK20011-1 Mecke’s Reagent (All Heroin)
10- NARK20012-1 Talwin (Pentazocine) Reagent
10- NARK20013-1 Ephedrine Reagent (Ephedrine, Pseudoephedrine)
10- NARK20014-1 Valium, Rohypnol, Ketamine Reagent
1- NARK2006 Acid Neutralizer, 1 oz. (30ml)

NARK® II NOTEBOOK & PATROL KITS
The Narcotic Notebook Kits were designed specifically for those departments in need of a convenient way to incorporate presumptive test kits in the field. Rather than carrying these tests loose and risk accidental breakage, this kit is made of hard black plastic with foam cutouts for 12 or 24 individual tests. A color chart showing the proper reactions is attached to the inside cover of the case. This kit contains most common tests used for presumptively identifying drugs of abuse.

The NARK® II Patrol Kit includes the 3 reagents most often used by patrol officers for presumptive drug screening: 4 tests for cocaine, 2 for methamphetamine and 2 for marijuana.

CATALOG NO. DESCRIPTION PRICE
NARK12PAK NARK® II 12-Pak Notebook Kit $44.95
NARK24PAK NARK® II 24-Pak Notebook Kit $79.95
NARK200VC NARK® II Patrol Kit $29.50

NARCOtIcS ANALYSIS BELt KIT
This handy Narcotics Analysis Kit slides directly onto your belt so you can always keep supplies within reach. Kit contains 2 tests each for Marijuana, Cocaine and Methamphetamine plus a 0.5 ounce pouch of acid neutralizer.

CATALOG NO. DESCRIPTION PRICE
NARK200BK Narcotics Analysis Belt Kit $19.95

NARK® II COCAINE ID SWIPes
These convenient Cocaine ID “Swipes” can presumptively identify cocaine from trace amounts of residue present on surfaces that have been in contact with cocaine. These 5” x 6” wipes are easy to use and results are immediate. Simply wipe the suspected surface with Cocaine ID Swipes and if cocaine is present, the swipe will immediately turn blue. Great for use by narcotics agents in the field and investigators at the crime scene.

CATALOG NO. DESCRIPTION PRICE
NS20150 NARK® II Cocaine ID Swipes, 1 box of 50 swipes $35.00
NS20150 Volume discount when ordering 6 boxes (300 swipes) or more $30.00

HOW TO USE COCAINE ID SWIPes:
Wipe suspected surface with Cocaine ID Swipe.
If Swipe turns blue, the presence of cocaine can be presumed.
The NARK® is a field test kit that offers screening of the most frequently abused drugs and narcotics. Reagents are packaged in disposable tubettes—a unique, easy-to-handle system. Each individual reagent is sealed in a thin, glass ampoule ensuring freshness and eliminating cross contamination with other reagents. The glass ampoules are secured in each end of the plastic tubette. The kit contains enough reagents to conduct 80 individual tests on a variety of drugs.

**POLYESTER POUCHES**

4.5 mil polyester pouches are more rigid and offer higher resistance to punctures and tears. These pouches offer another option for handling sharp objects, metals, and other dangerous objects.

The 4.5 mil pouches are highly desirable for the storage of drugs and other illicit substances.

They are an option to help make the job of transporting and storing dangerous objects and substances safer for all parties in the evidence handling process.

**HEAT SEALERS FOR POLYESTER POUCHES AND TUBING**

Use these heat sealers to seal Kapak® polyester pouches and tubing (not intended for use on polyethylene plastic bags). They’re available in 10 ½” and 18” sizes and both are 120V.

**KAPAK® 4.5 MIL CLEAR HEAT SEAL POLYESTER POUCHES**

Help eliminate cross contamination with these 4.5 mil high barrier, three side seal polyester pouches. They feature strong 3/8” seals without tear notches, are clear, heat sealable, and are the most durable pre made three side seal pouches in the industry.

</table>
**SIRCHMARK™ EVIDENCE TAPE**

SIRCHMARK™ Evidence Tape is made with a matte acetate base featuring a top surface that may be written on with pencil or pen. It is coated with a permanent, quick-setting acrylic adhesive that defies removal from most surfaces. To increase the tape’s ability to tear, it is perforated with $\frac{3}{16}$ slits at $\frac{1}{4}$ intervals. Dual-serrated tape edges add redundancy to the integrity. The tape’s top surface is printed in translucent red or blue ink, then overprinted with an opaque black identifier or an agency’s custom imprint. The roll is 1 $\frac{1}{2}$” wide, 0.001” thick, on a 3” core and is backed with 50 lb. stock Kraft liner.

Attempts to remove SIRCHMARK™ evidence tape will cause the tape substrate to break and peel off in irregular strips. The red or blue tint and black overprint will dissolve and smear when solvents like alcohol and acetone are applied—positive proof of tampering.

*Available in RED, BLUE or TRANSPARENT with or without imprint; or with a customized logo or message imprinted on the tape. Custom colors are available upon request.*

**SHARPSTUBE™ SYRINGE TRANSPORT TUBES**

Designed to hold a hypodermic syringe for transportation, these tubes are well-marked with bright orange-red international biohazard markings. One end of the tube contains a sealing material that will immobilize the syringe and prevent needle leakage. The 1” x 8” (2.5cm x 20.3cm) square construction allows for improved storage and handling.

NARK® Presumptive Drug Analysis

Each roll of SIRCHMARK™ Evidence Tape is supplied on a 3” core in a handy dispenser box.
NARK® Presumptive Drug Analysis

INTEGRITY EVIDENCE BAGS

The manner in which evidence is stored and protected can often mean the difference between conviction and acquittal. With this in mind, SIRCHIE® offers the integrity evidence bag.

These all-in-one bags are water-resistant, tear- and puncture-resistant, printable and include a tamperproof seal. No other evidence bag offers greater integrity, security, and convenience. Made of heavy-duty, 3.2-mil-thick, multi-layer, coextruded polyolefin film.

SEALS IN THREE STEPS:

1. Pull backing away from adhesive strip.
2. Fold flap over where indicated to seal.
3. No. IEB1200, No. IEB1550, No. IEB7500, No. IEB4000

FEATURES:
- Water-resistant • Tamperproof
- See-Through
- Tear Resistant • Printable
- Self-Sealing • Puncture Resistant
- Individually numbered and bar coded

All IEB Series bags are now individually numbered and bar coded.

MSV500D
The MSV500D Trade Van Platform Series remains the most popular disguise for surveillance applications nationwide. Their unassuming and common appearance does not draw attention, thus making them effective from the inner city to rural towns.

**FEATURES:**
- Single operator (standard) and dual operator models available.
- Ergonomic equipment mounting and control layouts.
- Standard multiplexed DVR recording system capable of recording multiple, simultaneous video streams.
- Optional hybrid systems and NVR’s (network video recorders).
- Low profile periscope with handheld, graduated speed, joystick controller.
- Optional fixed IP & PTZ IP cameras.
- Optional cellular modem with video encoder and free DDNS service.
- Contoured wall panels to provide maximum interior space.
- Optional retractable periscope and compressor driven (battery operated) air conditioner.

![Common trades van look](image)

Optional Extended Length Van with Dual (2) Operator Positions and Retractable Periscope

Interior Layout, view from rear doors towards cab.

MSV500D/RV
The MSV500D/RV is the ideal disguise for resort and vacation areas. The RV style surveillance van has all the same capabilities of a standard van in a vehicle with increased headroom for added comfort. The vehicle also features full 360-degree window observation due to installation of bay windows.

**FEATURES:**
- Insulated walls with sprayed in foam, contour formed to vehicle to provide the most complete insulation and usable interior space.
- Recessed mounting (below floor) of primary battery system to preserve interior van space for equipment and storage.
- Controls and equipment ergonomically arranged for easy operation.
- Added head space and higher periscope observation views.
- Spacious work counter.
- Interior configurations can be custom tailored to individual requirements.
- Accommodation of department supplied radios, MDTs, computers, etc...
- Full 360 degree viewing capability via window and bulkhead camera ports.

![Operator Seating Positioned For Easy Access To All Equipment](image)

For more info contact our Vehicle Division at vehicles@sirchie.com or 800.545.7375

Phone: (800) 545-7375 • (609) 654-0777  Fax: (609) 654-7869
FEATURES:
• Standard multiplexed DVR recording system capable of recording multiple, simultaneous video streams.
• Optional hybrid systems and NVR’s (network video recorders).
• Camera ports in bulkhead, left and right windows, and rear hatch can provide full 360 degree observation and recording capabilities.
• Standard 19” EIA rack mounting of equipment for easy service or upgrading of equipment as technology changes.
• Dedicated and separate battery banks for surveillance electronics and climate control systems.
• Standard compressor driven air conditioner and electric heater to maintain a comfortable interior.

**SUV5000**
A suitable disguise for virtually any environment, SIRCHIE®’s SUV5000 incorporates one of today’s most popular SUVs with the latest in digital video technology. Proven effective in the field, the SUV5000 provides a safe and easy to use climate controlled platform that does not compromise the comfort and safety of the operating officer. The SUV5000 is also capable of operating as an un-Manned “drop vehicle” through the use of optional PTZ IP cameras and Cellular Video Gateway.

**FEATURES:**
• Standard multiplexed DVR recording system capable of recording multiple, simultaneous video streams.
• Optional hybrid systems and NVR’s (network video recorders).
• Camera ports in bulkhead, left and right windows, and rear hatch can provide full 360 degree observation and recording capabilities.
• Standard 19” EIA rack mounting of equipment for easy service or upgrading of equipment as technology changes.
• Dedicated and separate battery banks for surveillance electronics and climate control systems.
• Standard compressor driven air conditioner and electric heater to maintain a comfortable interior.

**MSV200MINI**
The MSV200 Mini Van Series once again provides a suitable host for a surveillance conversion. Ideal for use in suburban areas where a work truck disguise may draw attention, these units can house a complete complement of surveillance equipment and provide full size van results.

**FEATURES:**
• Provided standard with a blackout curtain and optionally available with a security bulkhead.
• Video input and power panels located conveniently at all camera port locations.
• Factory seating provides ample head and legroom.
• Spacious work counter with all controls in easy reach of operator.
• Available with motorized periscope or window mounted camera systems.

For more info contact our Vehicle Division at vehicles@sirchie.com or 800.545.7375
MSV500U
The MSV500U is a larger vehicle ideal for multiple operators and other applications such as covert command or hostage negotiations. These higher profile vehicles are equipped with upper panel windows to accommodate fixed camera mounts or optional PTZ IP Cameras. Optional cellular video gateway allows operations to be monitored by the command staff and tactical team members using internet connected laptops and smart phones.

Rack Mount Equipment Suite
Open counter top design allows space for equipment such as a briefcase-style body wire gear, microwave video receivers, and telemetry control equipment.

FEATURES:
• Lockable exterior cabinets allow easy access for battery and equipment maintenance.
• Welded tubular steel frame construction of consoles, bench seat and cabinets for strength and durability.
• Office style interior with ample work space and storage cabinetry.
• Controls and equipment ergonomically arranged for easy operation.
• Added head space and higher periscope observation views.
• Interior configurations can be custom tailored to individual requirements.
• Accommodation of department supplied radios, MDTs, computers, etc...
• Full 360 degree viewing capability via window and bulkhead camera ports.
• Unsurpassed factory technical support from the longest active manufacturer of law enforcement surveillance vehicles.

UPGRADES & REFURBISHING PACKAGES
Surveillance vehicles are normally high use but low mileage units. Most 5-10 year old vehicles have been driven less than 20,000 miles and have paid for themselves many times over due to asset forfeiture laws. Retrofitting a still road-worthy, older vehicle with new digital video and audio equipment can produce a more functional surveillance platform than when the unit was first manufactured. And it’s older exterior appearance does not attract attention in the troubled areas where it is used. Several GSA Bundled packages are available—call for details.

• Replace cluttered counter tops and bulky equipment with spacious work tops and rack or wall mounted equipment which includes LCD flat screen monitors, hard disc recorders, and computer/IP systems.
• Multiplexed digital video recorders capable of recording multiple simultaneous video streams, replace VCRs, confusing switcher systems and outdated patch panels.
• Older manual or motorized periscopes are replaced with graduated speed, low profile remote control units with precision ground optical quality observation mirrors.
• Inverter and battery charging system upgrades provide cleaner 120V AC power and longer run times.
• New compressor driven air conditioners replace old wet ice units.
• Custom made blackout pads, camera socks and new privacy tint panels replace warped and scratched Plexiglass.

For more info contact our Vehicle Division at vehicles@sirchie.com or 800.545.7375

GSA Schedule Contract #GS-07F-5464G

IPVIS4000C BRIEFCASE IP VIDEO INTERFACE SYSTEM
With SIRCHIE’s IPVIS4000C, any surveillance vehicle or fixed site can benefit from secure, internet based video monitoring. Now all team members from the tech squad, SWAT Team, and supervisory personnel can monitor the video feed in real- time. Consequently, informed decisions can be communicated to make an arrest or extract the under-cover operatives. This system puts IP technology into an easy to use, lightweight, and portable package. Unit will ship ready to operate. Free DDNS service available, if required.

Specialized Police Vehicles

**IP NETSCOPE™ INTERNET PROTOCOL VEHICLE PERISCOPE SYSTEM**

The Sirchie Vehicle Division continues to deliver the latest advances in technology for surveillance vehicles. The IP NetScope™ is a solution that gives your team the flexibility and convenience of delivering a secure video feed that can be controlled remotely via any internet enabled device.

**Help Keep Your Team Safe, Informed, and Prepared for Action**

This technology gives you the option of running a surveillance operation with an unmanned vehicle while having the same control as manned operation. Using wireless internet technology and the included software, IP NetScope™ allows you to control the camera from any Internet enabled device including PC, laptop, tablet, or smartphone. You can control the pan, tilt, zoom, focus, and iris adjustment of your camera remotely from your device or with manual override in your vehicle.

**Observe, Monitor, or Lead Your Operation from Any Location with Internet Access**

Having the live video feed available via a secure internet connection allows all members of your team to view the feed in real time and be prepared for any necessary response and action. Whether you are in a command center; at the office; in the field; or remotely located anywhere in the world with internet access, you can monitor your operations. The IP NetScope™ supports multiple users allowing command staff, patrol, tech, and tactical teams to monitor the live stream in real time.

**Run Your Operation Around the Clock with the Right Optional Camera**

Sirchie’s IP NetScope™ offers the ability to work with a range of cameras including color, day/night, extreme low light, and night vision cameras to give you the versatility and flexibility you need to run your operation around the clock.

**Choose the Right Option for Your Departmental Needs**

Just imagine the flexibility, control, and increased safety you can have for your operation by employing the IP NetScope™ system. This exciting technology can be:

- Added on to the periscope in your existing surveillance van (NS5000IP)
- Incorporated into your existing surveillance vehicle with a new periscope (RCSS5000IP)
- Built as an option into a new surveillance vehicle quote from Sirchie.

Specialized Police Vehicles

FEATURES:
- Choice of either 20ft or 30ft electric mast.
- Choice of one or two 35X Optical PTZ-IP Cameras
- Optional Thermal Camera
- Optional LP Generator
- 1080p Hi-Def Camera option

VTT-20 & VTT-30 MOBILE OVERT SURVEILLANCE TRAILER
Events like the Boston Marathon occur many times throughout the year in America. The obvious need for video surveillance at these types of events is no longer a luxury but a necessity. Using the latest IP technology coupled with advance power systems, we are proud to announce our new video tower trailer, Mobile Overt Surveillance System. This unit is built on a 3500 pound capacity trailer chassis with an electrically operated mast. On-Board battery power system with a solar panel enhancement, provide the power for long term operations. A 20ft or 30ft tall mast is available to achieve the ideal vantage point for the cameras. Light enough to be towed by a squad car, this trailered system can be used anywhere a department needs to monitor large scenes such as parades, festivals and political events. The quick and easy deployment will also allow use for critical incidents such as hostage stand-offs and disaster scenes.

FEATURES:
- Choice of either 20ft or 30ft electric mast.
- Choice of one or two 35X Optical PTZ-IP Cameras
- Optional Thermal Camera
- Optional LP Generator
- 1080p Hi-Def Camera option
